### **Important information that may impact your Manufacturer's Warranty**

Adherence to the directions for use in this manual is extremely important for health and safety. Failure to strictly adhere to the requirements in this manual may result in personal injury, property damage and affect your ability to make a claim under the Vintec manufacturer's warranty provided with your product. Products must be used, installed and operated in accordance with this manual. You may not be able to claim on the Vintec manufacturer's warranty in the event that your product fault is due to failure to adhere this manual.

## WARNING

*The information in this document is subject to modification without any prior notice.*

Some models are available in dedicated countries only.

**VINTEC** offers no guarantee for our wine cellar if it is being used for any purpose other than that for which it was specifically designed. **VINTEC** cannot be held responsible for any error in this manual. **VINTEC** is not responsible or liable for any spoilage or damage to wines or any other contents incidental or consequential to possible defects of the wine cellar. Warranty applies to the wine cellar only and not to the content of the wine cellar.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance.

### **R600A WARNINGS**

The following models use small quantity of R600A (iso-butane) flammable refrigerant:

**AL/S3/BK:        V40SGe    – 35g**

For your safety please observe the following recommendations :

- This appliance contains a small quantity of R600A refrigerant which is environmentally friendly, but flammable. It does not damage the ozone layer, nor does it increase the greenhouse effect.
- During transportation and installation, ensure that the tubing of the refrigerant circuit is not damaged.
- Avoid using or manipulating sharp objects near by the appliances.
- Leaking refrigerant can ignite and may damage the eyes.
- In the event any damage does occur, avoid exposure to open fires and any device which creates a spark. Disconnect the appliance from the mains power.
- Thoroughly ventilate the room in which the appliance is located for several minutes.
- Notify Customer Service for necessary action and advice.

- The room for installing the appliance must be at least 1 cubic metre per 8 grams of refrigerant. The refrigerant quantity contained in this appliance is listed above in grams; it is also noted on the Rating Plate of the appliance.

**It is hazardous for anyone other than an Authorised Service Person to carry out servicing or repairs to this appliance.**

- WARNING: Keep ventilation openings in the appliance enclosure or in the built-in structure clear of obstruction.
- WARNING: Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- WARNING: Do not damage the refrigerant circuit.
- WARNING: Do not use electrical appliances inside the compartments.
- WARNING: In Queensland Australia, the authorized person must hold a Gas Work Authorisation for hydrocarbon refrigerants, before carrying out servicing or repairs which involve the removal of covers.

The environment and personal safety must be considered when disposing of this appliance. Please ensure the appliance is taken to a recycle center for safe recycling. DO NOT dispose of the appliance in land fill as the insulation and refrigerant gas contained in these appliances are flammable.

**Allow 24 hours before switching on the wine cellar. During this time we recommend that you leave the door open to clear any residual odors.**

## **BEFORE LOADING & PLUGGING IN THE WINE CELLAR**

***Important: All models without front venting (air opening) are strictly for free standing only. (See technical chart)***

### **Recommendations:**

The location you have selected for your wine cellar should:

- be unencumbered and well ventilated;
- be well away from any heat source and direct sunlight;
- not be too damp (laundry, pantry, bathroom etc.);
- have a flat floor;
- have a standard and reliable electricity supply (standard socket to country standards, linked to the ground), it is NOT recommended to use a multi-socket or extension lead;
- have a surge protector fitted to the electrical outlet;
- away from the microwave oven. Certain microwave ovens do not have wave interference shield. When placed within 1 meter vicinity of the wine cabinet, they may affect the operation of the wine cabinet.

The wine cellar should be placed where the ambient temperature is between 5°C to 35°C. If the ambient temperature is above or below this range, the performance of the unit may be affected. Placing your unit in extreme cold or hot conditions may cause interior temperatures to fluctuate. The ideal range of temperature may not be reached. (See Climate Class at the end of this manual)

### **Grounding instructions**

The wine cellar must be grounded in case of an electrical short circuit. Grounding reduces the risk of electrical shock. The wine cellar is equipped with a power cord having a grounding wire and plug. The wine cellar plug must be plugged into a properly affixed and grounded electrical outlet.

**Note:** *In locations where there is frequent lightning, it is advisable to use surge protectors.*

Improper use of the grounding plug can result in the risk of electric shock. Consult a qualified electrician or service person if the grounding instructions are not completely understood.

If the supply cord is damaged, it must be replaced by a qualified person in order to avoid electrical hazard.

## **INSTALLING YOUR WINE CELLAR**

Unpack and remove all of the protection and adhesive strips from the packaging around and inside the wine cellar.

The wine cellar must be positioned such that the plug is accessible. Release the power cord. Move your wine cellar to its final location. The wine cellar should be installed in a suitable place where the compressor will not be subject to physical contact.

**Leveling your wine cellar:** Wine cellar must be leveled BEFORE loading your wines. Your Vintec wine cellar is equipped with 4 adjustable feet to facilitate easy leveling. VINTEC recommends that you tighten the back feet to the maximum and adjust the front feet to level the wine cellar.

### Fixing the Back spacer:

Compressor run appliances require proper ventilation for proper and longer usage. Your Vintec wine cellar is supplied with a back spacer. Affix the back spacer at the back of the cellar for air circulation and heat evacuation.

#### INSTALLATION OF BACK SPACER

**IMPORTANT - THIS SPACER MUST BE ATTACHED TO THE UNIT BEFORE THE INSTALLATION, FOR VENTILATION PURPOSE. FAILURE TO DO SO VOIDS THE WARRANTY**

1. Vintec “Built in” wine cellars are front venting but are not designed to be fully integrated behind a joinery door.
2. Vintec “Built in” wine cellars require 10mm clearance on both sides and top, 30mm clearance at the rear (Back spacer is provided), to facilitate installation, removal, servicing and ventilation.
3. Vintec “Built in” wine cellars draw air from the rear and expels through the metal grid under the door at the front. If a kick board is to be placed in front of the wine cellar’s grid another one must be fitted into the kick board with a minimum air flow allowance of 150cm<sup>2</sup>.
4. Vintec “Built in” wine cellars have a power switch located on the control panel so power point location is not critical.
5. The wine cellar requires a standard 240 volt/10 amp power point. (Or according to different countries specifications).
6. The power cord is 1.9m in length and is fixed on the right side at the back when looking from front of cabinet.
7. As with most appliances of today, the wine cellar has sensitive electronic components which are susceptible to damage through lightning and electricity supply faults. It is therefore advised to use a power surge protector to avoid problems of this nature.

**8 Air vent within the joinery must be provided for Vintec built in wine cellars (front venting)**

In Hot climate zone, an air vent or grid, with a minimum ventilation size of 200mm x 40mm MUST be cut out at the rear top of the back partitioning or at the top of either side of the partitioning, allowing cool fresh air full access to flow into the 30mm gap located at the rear of the cabinet.

This air vent or grid must not be opened on the same side as other appliances such as ovens or an area that is sealed and without access to fresh cool air. Failing to comply with the above specifications could result in WARRANTY void.

## INSTALLATION DRAWINGS FOR BUILT IN WINE CELLARS:

## Dimensional drawings:

**FRONT VIEW**

**SIDE VIEW**

**TOP VIEW**

**NOTE: Illustrations not to scale.**  
All dimensions in millimetres.

\* Minimum 10mm required whether proud-fit or flush-fit, however 30mm is recommended on the opening edge for easy finger grip access when installed flush-fit.

For complete installation instructions, please refer to the user manual for this product.

## TURNING ON YOUR WINE CELLAR

Plug in and switch on the cellar by pressing on the power button **for a few seconds**.

When you use the wine cellar for the first time (or restart the wine cellar after having it shut off for a long time), there will be a few degrees variance between the temperature you have selected and the one indicated on the LED readout. This is normal and it is due to the length of the activation time. Once the wine cellar is running for a few hours everything will stabilize.

***Important: If the unit is unplugged, power is lost, or turned off, wait 3 to 5 minutes before restarting the unit. The wine cellar will not start if you attempt to restart before this time delay.***

### Operating Noises

To reach the desired temperature settings, VINTEC wine cellars, like all wine cellars operating with compressors and fans, may produce the following types of noises. These noises are normal and may occur as follows:

- Gurgling sound - caused by the refrigerant flowing through the appliance's coils.
- Cracking/popping sounds - resulting from the contraction and expansion of the refrigerant gas to produce cold.
- Fan operating sound - to circulate the air within the wine cellar.

An individual's perception of noise is directly linked to the environment in which the wine cellar is located, as well the specific type of models. VINTEC wine cellars are in line with international standards for such appliance. VINTEC will always do its utmost to satisfy its customers but will not retake possession of the goods due to complaints based on normal operating noise occurrences.

## LOADING YOUR WINE CELLAR

You may load your wine bottles in single or double rows while taking note of the following: if you do not have enough bottles to fill your wine cellar, it is better to distribute the load throughout the wine cellar so as to avoid “all on top” or “all below” type loads.

- Do remove or relocate adjustable wooden shelves to accommodate larger type of bottles or increase the capacity of the cellar by stacking the bottles up when necessary. (See removing shelves)
- Keep small gap between the walls and the bottles to allow air circulation. Like an underground cellar air circulation is important to prevent mould and for a better homogeneous temperature within the cellar.

- Do not over load your wine cellar to facilitate air circulation.
- Do not stack more than 1.5 rows of standard 0.75L bottles per shelves to facilitate air circulation
- Avoid obstructing the internal fans (located inside on the back panel of the wine cellar).
- Do not slide the shelves outwards beyond the fixed position to prevent the bottles from falling.
- Do not pull out more than one loaded shelf at a time as this may cause the wine cellar to tilt forward.
- Do not cover the wooden shelves with alloy foil or other materials, as it will obstruct air circulation.
- Do not move your wine cellar while it is loaded with wines. This might distort the body of the wine cellar and cause back injury.

## TYPES OF REGULATION

Please note that depending on the loading and settings chosen it takes about 24 hours for the wine cellar to see the temperature stabilising.

During this time LED seems to move erratically. It is normal and this process occurs whenever the setting is modified and/or whenever a large amount of bottles are added to the cellar.

### **Single temperature Maturing/Storage wine cellars:**

AL/S3/BK:

V30SG standard regulation

V30SGe, V40SGe: electronic regulation, digital display.

Designed to store and mature all wines: red, white and sparkling. These wine cellars reproduce the ideal conditions for **wine storage**, at a constant recommended temperature of 12°C. They can also be set to provide ideal serving temperature for full enjoyment of the wine's qualities. Unless stated by the wine maker on the bottle, **VINTEC** recommends 7°C for your champagne, 12°C for whites and 18°C for reds. (Refer to "Wine Service Temperature" recommendation chart)

## TEMPERATURE SETTINGS

**Important:** *The LCD displays by default the actual internal air temperature.*

The temperature settings are pre-set at the factory as follows. In the event of a power interruption, all previous temperature settings are automatically erased and it will revert to the preset temperature settings.

### Factory preset chart

Setting	Temperature
12	12°C (+/- 2.5°C)
12	12°C (+/- 2.5°C)

*It is important to understand that there is a difference between the air temperature inside the wine cellar and the actual temperature of the wine: You will need to wait approximately 12 hours before noticing the effects of temperature adjustment due to the critical mass within a full wine cellar.*

Once the temperature is set, it is strongly advised not to toy with it or adjust frequently. The thermostat will maintain the temperature inside the wine cellar within a +/- 2.5°C range. But the thermal inertia of the wine and the glass is such that within this temperature range, the actual temperature of the wine will only fluctuate 0.5°C to 1°C.

The “DISPLAY LED” displays the internal temperature. The set temperature automatically appears by pressing either the UP or DOWN button

### To modify the pre-set temperature

Adjust the desired cooling temperature by pressing the UP or DOWN buttons. Each depression of the buttons will scroll through the available temperature settings in increments of 1 degree Celsius. The temperature setting can be adjusted from 6 to 18°C. To view the “set” temperature, press and hold the UP or DOWN buttons, the “set” temperature will temporarily “flash” in the LED display for 5 seconds.

12°C to 14°C. The below chart is an indicative temperature chart to indicate the best temperature for drinking purposes.

Champagne NV, Sparkling, Spumante	6°C
Dry White Semillon, Sauvignon Blanc	8°C
Champagne Vintage,	10°C
Dry White Chardonnay	10°C
Dry White Gewürztraminer, Riesling, Pinot grigio	10°C
Sweet White Sauternes, Barsac, Montbazillac, Ice Wine, Late Harvest	10°C
Beaujolais	13°C
Sweet White Vintage: Sauternes...	14°C
White Vintage Chardonnay	14°C
Red Pinot Noir,	16°C
Red Grenache, Syrah	16°C
Red Vintage Pinot Noir	18°C
Cabernet & Merlot: French, Australian, New Zealand,	20°C
Chilean, Italian, Spanish, Californian, Argentinean...	
Vintage Bordeaux ...	Room temperature not exceeding 20°C

## IMPORTANT INFORMATION ABOUT TEMPERATURE

Your VINTEC wine cellar has been designed to guarantee optimum conditions for storing and/or serving your wines.

Fine wines require long and gentle developments and need specific conditions in which to reach their full potential.

All wines mature at the same temperature, which is a constant temperature set between 12°C to 14°C. Only the temperature of “dégustation” (wine appreciation) varies according to the type of wines (see “Wine Serving Temperature Chart” above). This being said and as it is for natural cellars used by wine producers for long period of storage, it is not the exact temperature that is important, but its consistency. In other words, as long as the temperature of your wine cellar is constant (between 12°C to 14°C) your wines will be stored in perfect conditions.

Not all wines will improve over the years. Some should be consumed at an early stage (2 to 3 years) while others have tremendous ageing capability (50 and over). All wines have a peak in maturity. Do check with your wine merchant to get the relevant information.

## DEFROSTING/CONDENSATION/ HYGROMETRY/ VENTILATION

Your wine cellar is designed with “Auto-cycle” defrost system. During “Off-cycle” the refrigerated surfaces of the wine cellar defrost automatically. Defrost water from the wine cellar storage compartment drains automatically and part of it goes into a drainage container, which is located at the back of the wine cellar next to the compressor. The heat is transferred from the compressor and evaporates any condensation that has collected in the pan. Part of the remaining water is collected within the wine cellar for humidity purposes.

This system enables the creation of the correct humidity level inside your wine cellar required by the natural cork to maintain a long lasting seal.

**Notes:** *The water collected by condensation, is therefore recycled. Under extremely dry environmental conditions, you may have to add some water into the water container provided with your wine cellar.*

All units are equipped with a double glazed glass door that has a third internal acrylic layer to minimize condensation on the glass door.

The wine cellar is not totally sealed; fresh air admission is permitted through the drainpipe. Air is circulated through the cellar by means of a fan/fans and the hollow shelves.

**Notes:** During the refrigerating cycle, heat is given off and disperses through the external surfaces of the wine cellar. Avoid touching the surfaces during those cycles.

## ADJUSTABLE WOODEN SHELVES

### Adjusting/removing the shelves

For easy access to the storage content, you must pull the shelves approximately 1/3 of its depth out of the rail compartment. These wine cabinets, however, are designed with a notch on each side of the shelf tracks to prevent bottles from falling.

When removing any of these shelves out of the rail compartment, tilt the shelf as per the diagram and simply pull out, or push in the shelf until it sits on the support brackets securely.

## REVERSIBILITY OF THE DOOR

**Warning:** To avoid accidents during the process of changing the door, we recommend that you get assistance. The glass door is heavy and may cause injury if dropped.

- Depending on to the model and the type of handle your wine cabinet is equipped with, you may have to rotate the door through 180 degrees.
- Depending on the type of handle your wine cabinet is equipped with, the door may not be reversible or may require that a left or right opening door be ordered to change the opening side.

## V40 AL models (30mm recess plinth)

- |                     |                       |                |
|---------------------|-----------------------|----------------|
| 1 Lock screws       | 2 Lower hinge (Right) | 3 Door axis    |
| 4 Top hinge (Right) | 5 Door                | 6 Cabinet body |
| 7 Top hinge (Left)  | 8 Lower hinge (Left)  |                |

- Unscrew the lock screws (1); (Fig. 1) to remove the door axis located at the bottom.
- **While holding the door firmly**, pull the door (5) outward and take it out; (Fig. 2)
- Remove the 3 bolts and take out the right top hinge (2); (Fig. 3)
- Fix the left top hinge and the bottom left hinge with the bolts as per Fig. 4,
- Re-install the door the same way it was removed and fix back the door axis.

## V40 S3/BK models

- |                               |                             |                              |
|-------------------------------|-----------------------------|------------------------------|
| <b>1. Lower hinge (right)</b> | <b>2. Screws</b>            | <b>3. Door axis</b>          |
| <b>4. Door</b>                | <b>5. Top hinge (right)</b> | <b>6. Hinge screws</b>       |
| <b>7. Top hinge (left)</b>    | <b>8. Hole covers</b>       | <b>9. Lower hinge (left)</b> |
| <b>10. Door limit device</b>  | <b>11. Screw</b>            |                              |

1. Open the door to a 90 degrees angle, take out the 2 screws (2) from lower door axis (3), remove the door (4), Remove the axis plate (3) from the door, (Fig. A).
2. Unscrew the screw (11) located underneath the doorframe and the limit device (10), and relocate it at left end side of the door frame. (Fig. A/B)
3. Take out the 3 hinge screws (6) from the top hinge (right) (5) and remove it. (Fig. C)
4. Remove decorative nail (8) from left top of cabinet and install spare top hinge (Left) (7) at left top of cabinet with 3 screws. (Fig. D)
5. Following the above procedure, install the spare lower hinge to the left (9). (Fig. E)
6. Install and aligned the door.
7. Insert the plastic caps to cover the holes(8).

## OPERATION ANOMALIES

Ensure that there is power to the electrical supply plug by connecting another electrical appliance to it. Check fuse, if any. Make sure that the door is closed properly.

If your wine cellar appears to be malfunctioning, unplug it and contact your **VINTEC's** after sales service. Any intervention on the cold circuit should be performed by a refrigeration technician who should carry out an inspection of the circuit sealing system. Similarly, any intervention on the electrical circuit should be performed by a qualified electrician.

**Notes :** *Any intervention performed by a non- authorised technician by Vintec will lead to the warranty being considered as null and void.*

## POWER FAILURES

In the event of a power interruption, all previous temperature settings are automatically erased and it will revert to a preset temperature setting. (see preset chart)

Most power failures are corrected within a short period of time. An hour or two's loss of power will not affect wine cellar's temperatures. To avoid sudden change of temperature while the power is off, you should avoid opening the door. For longer period of power failure, do take steps to protect your wine.

**Irrespective of the cause, if you notice either abnormal temperature or humidity levels inside your wine cellar, be reassured that only long and frequent exposure to these abnormal conditions can cause a detrimental effect on your wines.**

## TROUBLESHOOTING GUIDE

Common problems may easily be solved, saving you the cost of a possible service call. Please read carefully the instruction manual and revert to troubleshooting guide chart.

PROBLEM	POSSIBLE CAUSE
Wine cellar does not operate.	Not plugged in. The appliance is turned off. The circuit breaker tripped or the fuse is broken.
Wine cellar is not cold enough.	Check the temperature control setting. External environment may require a higher setting. The door is opened too often. The door is not closed completely. The door gasket does not seal properly.
Turns on and off frequently.	The room temperature is hotter than normal. A large amount of contents has been added to the Wine cellar. The door is opened too often. The door is not closed completely. The temperature control is not set correctly. The door gasket does not seal properly.
The light does not work.	Not plugged in. The circuit breaker tripped or a blown fuse. The bulb is out of order. The light button is "OFF".
Vibrations.	Check to assure that the Wine cellar is level.
The Wine cellar seems to make too much noise.	The rattling noise may come from the flow of the refrigerant, which is normal. As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in your Wine cellar. Contraction and expansion of the inside walls may cause popping and crackling noises. The Wine cellar is not level.
The door will not close properly.	The Wine cellar is not level. The door was reversed and not properly installed. The gasket is faulty. ( magnet or rubber is spoiled) The shelves are out of position.

FOR SALES IN AUSTRALIA AND NEW ZEALAND  
APPLIANCE: ALL VINTEC/TRANSTHERM

**This document sets out the terms and conditions of the product warranties for Vintec/Transtherm Appliances. It is an important document. Please keep it with your proof of purchase documents in a safe place for future reference should there be a manufacturing defect in your Appliance. This warranty is in addition to other rights you may have under the Australian Consumer Law.**

**1. In this warranty:**

- (a) 'ACL' or 'Australian Consumer Law' means Schedule 2 to the Competition and Consumer Act 2010;
- (b) 'Appliance' means any Electrolux product purchased by you and accompanied by this document;
- (c) 'ASC' means Electrolux's authorised serviced centres;
- (d) 'Vintec/Transtherm' is the brand controlled by Electrolux Home Products Pty Ltd of 163 O'Riordan Street, Mascot NSW 2020, ABN 51 004 762 341 in respect of Appliances purchased in Australia and Electrolux (NZ) Limited (collectively "Electrolux") of 3-5 Niall Burgess Road, Mount Wellington, in respect of Appliances purchased in New Zealand;
- (e) 'Warranty Period' means the period specified in clause 3 of this warranty;
- (f) 'you' means the purchaser of the Appliance not having purchased the Appliance for re-sale, and 'your' has a corresponding meaning.

**2. Application:** This warranty only applies to new Appliances, purchased and used in Australia or New Zealand and is in addition to (and does not exclude, restrict, or modify in any way) other rights and remedies under a law to which the Appliances or services relate, including any non-excludable statutory guarantees in Australia and New Zealand.

**3. Warranty Period:** Subject to these terms and conditions, this warranty continues for in Australia for a period of 24 months and in New Zealand for a period of 24 months, following the date of original purchase of the Appliance.

**4. Repair or replace warranty:** During the Warranty Period, Electrolux or its ASC will, at no extra charge if your Appliance is readily accessible for service, without special equipment and subject to these terms and conditions, repair or replace any parts which it considers to be defective. Electrolux may, in its absolute discretion, choose whether the remedy offered for a valid warranty claim is repair or replacement. Electrolux or its ASC may use refurbished parts to repair your Appliance. You agree that any replaced Appliances or parts become the property of Electrolux.

**5. Travel and transportation costs:** Subject to clause 7, Electrolux will bear the reasonable cost of transportation, travel and delivery of the Appliance to and from Electrolux or its ASC. Travel and transportation will be arranged by Electrolux as part of any valid warranty claim.

**6. Proof of purchase** is required before you can make a claim under this warranty.

**7. Exclusions:** You may not make a claim under this warranty unless the defect claimed is due to faulty or defective parts or workmanship. This warranty does not cover:

- (a) light globes, batteries, filters or similar perishable parts;
- (b) parts and Appliances not supplied by Electrolux;

- (c) cosmetic damage which does not affect the operation of the Appliance;
- (d) damage to the Appliance caused by:
  - (i) negligence or accident;
  - (ii) misuse or abuse, including failure to properly maintain or service;
  - (iii) improper, negligent or faulty servicing or repair works done by anyone other than an Electrolux authorised repairer or ASC;
  - (iv) normal wear and tear;
  - (v) power surges, electrical storm damage or incorrect power supply;
  - (vi) incomplete or improper installation;
  - (vii) incorrect, improper or inappropriate operation;
  - (viii) insect or vermin infestation;
  - (ix) failure to comply with any additional instructions supplied with the Appliance;

In addition, Electrolux is not liable under this warranty if:

- (a) the Appliance has been, or Electrolux reasonably believes that the Appliance has been, used for purposes other than those for which the Appliance was intended, including where the Appliance has been used for any non-domestic purpose;
- (b) the Appliance is modified without authority from Electrolux in writing;
- (c) the Appliance's serial number or warranty seal has been removed or defaced.

**8. How to claim under this warranty:** To enquire about claiming under this warranty, please follow these steps:

- (a) carefully check the operating instructions, user manual and the terms of this warranty;
- (b) have the model and serial number of the Appliance available;
- (c) have the proof of purchase (e.g. an invoice) available;
- (d) telephone the numbers shown below.

**9. Australia:** For Appliances and services provided by Electrolux in Australia: Electrolux goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Appliance repaired or replaced if the Appliance fails to be of acceptable quality and the failure does not amount to a major failure. 'Acceptable quality' and 'major failure' have the same meaning as referred to in the ACL.

**10. New Zealand:** For Appliances and services provided by Electrolux in New Zealand, the Appliances come with a guarantee by Electrolux pursuant to the provisions of the Consumer Guarantees Act, the Sale of Goods Act and the Fair Trading Act. Where the Appliance was purchased in New Zealand for commercial purposes the Consumer Guarantee Act does not apply.

**11. Confidentiality:** You accept that if you make a warranty claim, Electrolux and its agents including ASC may exchange information in relation to you to enable Electrolux to meet its obligations under this warranty.

**Important Notice**

Before calling for service, please ensure that the steps listed in clause 8 above have been followed.
