Great wines are crafted with an obsession for quality at each step of the production process: from viticulture through oenology to maturation, not a single phase can be overlooked.

The first two steps are in the hands of professional winemakers, but serious collectors, sommeliers and merchants know that they accept responsibility for successful long-term maturation.

They also know that Vintec climate-controlled cellars are the most reliable tools for ensuring their collections are protected.

"I am totally delighted with my Vintec wine cabinet. It combines elegance and functionality of the highest order."

– James Halliday, leading Australian wine critic

Why choose Vintec?

Wine cellars are our specialty

In fact, that is all we do. Being intimately connected to the wine industry and focussed solely on wine cabinets for over two decades, we have developed the largest and most advanced range to suit all wine storage requirements.

We care about your collection

Our highest priority is to offer the best and safest storage solution for your wine. For instance, all our cellars have dark interiors and dim UV-free lighting, instead of white interiors and bright lights. Why? Because it’s important to keep your wine in a dark storage area.

The Vintec guarantee

All Vintec wine cellars have been tested to ensure they function in Australian and New Zealand climates. Covered by a two year warranty, our cellars bear unique identification numbers that allow their origin and authenticity to be traced. They are also backed by dedicated phone support teams in Sydney and Auckland, as well as a national network of service specialists.

Become a member of the Vintec Club

When you own a Vintec, you’re entitled to become a member of the Vintec Club and enjoy exclusive wine industry benefits, discounts and services including:
• Invitations to Vintec Club Private Tastings;
• Ongoing VIP pricing on Riedel glassware;
• Langton’s wine voucher; and
• Privileged access to the Scotch Malt Whisky Society.

Find out more on page 44.
The Vintec story

Vintec is recognised across Australia and the Asia-Pacific region as the benchmark for wine preservation solutions.

We offer precision tools for cellaring and serving that are coveted by enthusiastic collectors, sophisticated entertainers and industry professionals alike.

We are deeply passionate about wine, and believe that correct temperature control can unlock a whole new level of enjoyment and satisfaction for your wine experience.

Heritage

The Vintec brand was created in 2000 by two entrepreneurial Frenchmen who shared a common love for wine. They leveraged their previous experience with the Transtherm luxury wine cabinets brand to collaborate with Danish designers and manufacturers to introduce a range of stylish, functional and accessible wine preservation systems.

Products

Vintec has the widest range of wine cellaring and serving solutions to meet all requirements and capacities from 20 to 4000 bottles: if Vintec can’t meet your needs, no other brand can.

Knowledge

We offer wine expertise without the ego, to guide you along your wine journey and provide you with knowledge and confidence to appreciate your wine at its best.
The golden rules of wine storage

1. **Stable temperature**
Vintec cabinets ensure your wines are stored in the ideal cellaring conditions by respecting these five essential rules.

- **Temperature fluctuations**
  - Denature your wines. In particular, temperatures above 25°C will ruin wine within a couple of weeks and create “spoiled fruit” flavours.

2. **Humidity above 50%**
- Vintec wine cabinets incorporate a Thermal Recycling Pump that ensures adequate humidity levels are maintained (50% or greater). The system works by heating condensed water, which is then introduced as humid air within the cabinet (see page 10).

3. **Dark storage area**
- Our wine cabinets maintain stable temperature thanks to:
  - Interaction between a compressor and a thermostat;
  - Insulated side panels; and
  - Double/triple-glazed doors.

4. **No vibrations**
- Vintec cabinets protect wine from light damage by incorporating:
  - UV-treated tinted glass doors;
  - Dark interiors; and
  - Dimmed LED lights.

5. **Airflow**
- To protect the quality of your wine, our cabinets create a vibration-proof environment by including:
  - An externally-housed compressor;
  - Rubber shock absorbers; and
  - Vibration-absorbing wooden shelves.

All light should be avoided, but UV light in particular: it creates hydrogen sulphide compounds in wine and affects the tannins and colour of your wine.

Imperceptible vibrations prematurely deteriorate wine by speeding up chemical reactions and ageing.

Lack of appropriate ventilation and air change makes wine cellars become stale and mouldy.

Vintec cabinets ensure your wines are stored in the ideal cellaring conditions by respecting these five essential rules.
Why a wine cabinet instead of a fridge?

Traditional refrigerators generate intense cold and remove ambient humidity. They denature your wines and dry out corks.

Vintec wine cabinets are designed specifically for the preservation and maturation of your wines: they use thermal recycling pump technology to replicate the ideal conditions found in the best natural underground cellars (see diagram below).

Caring for the environment as well as your wine

Vintec climate-controlled wine cabinets are equipped with energy-efficient R600a refrigerant gas, which has zero ozone-depleting properties.

The switch to R600a is part of a series of initiatives that Vintec has undertaken in order to limit our carbon footprint and to preserve the environment.

Technology

1. Condensed water released from outlet pipe into collection tray
2. Water heated to produce vapour
3. Humid air drawn up through shaft into cabinet

Features

- Adjustable sliding beechwood anti-vibration shelves
- Carbon filters
- LED lighting, temperature display and control panels
- Audio and visual alarms
- Integrated locks
- Dual-cycle cooling and heating for constant temperature
- Anti-UV tinted glass doors
Selecting your wine cabinet

Capacity

| Home Wine Bars | 20 – 50 bottles |
| Epicure Range  | 110 – 198 bottles |
| Walk-in Cellars| 600 – 4000 bottles |

Capacities expressed are based on that achieved in our testing using standard 750ml Bordeaux style wine bottles (see page 54 for dimensions) or 330ml beer bottles. Our cabinets can accommodate other shapes and sizes of bottles, however their inclusion may affect overall maximum capacity.

Easy = capacity that can be reached with all supplied shelves installed and with a maximum of 4 - 5 levels of stacking per shelf.
Max = maximum capacity that can be reached. For some models, reaching this capacity requires using less shelves than supplied.

Function

Single Zone

Since all wines – reds, whites and Champagne – cellar at the same temperature (12° - 14°C), a Single Zone cabinet is ideal for conveniently storing and cellaring all your wines. Alternatively, a Single Zone cabinet can be used to serve wines at optimal drinking temperatures: either 6° - 8° for white, or 16° - 18° for red.

Dual Zone

A Dual Zone cabinet is ideal for keeping both reds and whites at optimal respective drinking temperatures. Set one compartment at 6° - 8°C for whites and Champagne, and the other at 16° - 18° for reds. Alternatively, one compartment can be set at a serving temperature and the other at 12° - 14° for cellaring.

Multi Temp

Vintec’s versatile Multi Temp technology is designed for serving different styles or varietals at their optimal individual drinking temperatures. For instance, setting the bottom at 6°C and the top at 18°C generates a temperature gradient throughout the cabinet allowing you to keep several different varietals all shelved at their optimal drinking temperatures.
You love to entertain at home and it’s important that your guests are well received. A Vintec Home Wine Bar is designed to be placed underbench and suit the modern lifestyle. Have your best wines on hand at perfect serving temperatures ready to be enjoyed, or cellar a small collection with confidence.
Single Zone Wine Cabinets

Wine cabinets for cellaring all varieties (set at 12° - 14°C), or serving either white/Champagne (6° - 8°) or red (16° - 18°).

At last, the perfect solution to Australia’s warm climate – a Vintec wine cabinet.

Temperature control is everything with wines, especially with older wines – it doesn’t take much to ruin them – you have to care for them from the moment you get them to the moment you drink them.

I use Vintec and I’m happy to recommend them because they’re quality products which work incredibly well for me.

At last, the perfect solution to Australia’s warm climate – a Vintec wine cabinet.

“A full-bodied red wine, served at, say 22° to 24°C, may cause it to taste mawkish and lack refreshment. Which is one of the reasons so many of Australia’s better restaurants store their reds in wine storage units from specialist companies like... Vintec.”

The Vintec Club
The Vintec Club is a private club for owners of Vintec and Transtherm wine cellars.

Purchasing any cellar entitles you to lifetime membership – our way of saying thank you to our discerning and valued customers who invariably love wine.

Whether you acquired your wine cabinet today or ten years ago, it would be a pleasure to welcome you as the newest member of our community.

MEMBER BENEFITS:
- Invitations to Vintec Club Private Tastings;
- Ongoing VIP pricing on Riedel glassware;
- Langton’s wine voucher; and
- Privileged access to the Scotch Malt Whisky Society.

When you become a member of the Vintec Club, you’re entitled to the expert service of a personal Langton’s Wine Broker (in New Zealand this is offered via the New Zealand Wine Society) who will provide you with direct and privileged access to the greatest wines and vintages of Australia, New Zealand and the world – at private customer prices.

Your broker will:
- advise you on rare and collectible wines and even place auction bids for you;
- source local and imported wines from over 500 leading wineries for you; and
- get to know your favoured wine styles.

As a member of the Vintec Club you have access to a dedicated Concierge service, which includes:
- cellar management and care tips;
- cellar service and warranty requests;
- member benefit enquiries; and
- bookings for Vintec Club Private Tastings.

Peter Bourne – aka “The Wine Man” – is synonymous with enthusiasm and passion for all things vinous.

He’s a wine educator and judge, who also writes for Gourmet Traveller Wine and Qantas The Australian Way magazines.

Peter’s enthusiasm is now extended to Vintec Club members, who are encouraged to take advantage of his expertise via Q&A and his regular feature columns on our wine blog.

Peter is also an expert on collectible wines, and as a member you have the opportunity to contact him for advice.
Members of the Vintec Club receive exclusive invitations to unique wine experiences and intimate dinners in the company of celebrated winemakers from around the world.

Hosted in a family-like and relaxed atmosphere, the Vintec Club Private Tastings are an opportunity to share with our members our passion for well-aged wines.

These private events are subsidised by the Vintec Club in order to bring our members exceptional wine tastings and dinners at nominal ticket prices.

VINTEC CLUB
PRIVATE TASTINGS
The Vintec Club Shop is an exciting treasure trove of beautiful and functional accessories to enhance your wine appreciation. From serving and preserving to glassware and tableware, every item in our range is a collectible statement of style.

Vintec Club members receive generous discounts, as well as access to rare and limited edition items.

**FEATURED BRANDS:**

**Professor Claus J. Riedel** was the first to recognise that the bouquet and balance of wines are affected by the shape of the glass. Riedel is now recognised worldwide for designing and producing the highest quality glassware for the enjoyment of wine.

**Legnoart** was born out of love and passion for wood and beauty. After almost seventy years, Legnoart is among the major Italian companies in the household, kitchen and cellar furniture design business, and is distributed in over 52 countries.

**Üllo** is a revolutionary wine purifier that restores the natural taste of wine with Selective Sulfite Capture™ filter technology. Breathe life into reds, or maintain the balance of whites. Twist the aerator on or off to suit your preference.

**SPECIAL PRICES**

Access to special prices for club members on all shop items.

**MEMBERS AREA**

Access to rare and limited edition items.

**Browse today at vintecclub.com/shop**

**RIEDEL VIP**

Ongoing 20% VIP discount, plus free nationwide delivery.

**VIP**
Technical Guidelines
Ventilation

All Vintec cabinets are equipped with compressors that generate heat and therefore require a minimum ventilation gap when building them into cabinetry, or positioning them under benches or adjacent to other appliances. The diagrams on these pages are a guide to assist purchasing selection, but detailed, model-specific ventilation requirements should be obtained from our website at vintec.com.au prior to installation. A ventilation grill must be installed for any cabinet built under bench or into cabinetry.

**Outdoor/alfresco use**

Units being installed in outdoor/alfresco areas must be kept out of direct sunlight and away from rain.

* Extra space is recommended on the opening edge/top for easy finger grip access, as well as on the hinge side to allow doors to open wide enough for shelves to slide out.

**NOTE:** Illustrations not to scale. All dimensions in millimetres.
Capacity and shelf stacking

NOTE: Illustrations not to scale.
All dimensions in millimetres.

Different shapes and sizes
This brochure makes reference to the ‘standard Bordeaux style bottle’ when specifying capacity. The dimensions and proportions of this bottle shape are shown at 1. However, wine producers use a huge range of different bottle shapes and sizes, some of which are shown at 2.

Bottle shape variety should be considered when selecting the appropriate Vintec cabinet in which to house your precious collection, since shelf height and adjustability varies across the product range.

Please also be aware that some bottles will not fit opposite each other on the same shelf and this may affect capacity. You may need to lay the bottles opposite more suitably shaped bottles. Ideally, bottles should lie with their necks comfortably interlocking as seen at 2.

Stacking for ageing
When filling your cabinet, we suggest stacking the bottles you wish to cellar and mature at the back of the shelves, and the wines you wish to consume in the short-term at the front (see below).

Stacking for accessibility
When stacking bottles, it is practical to keep bottles from the same case together. See diagrams below, in which bottles from the same case are represented by the same colours.

Vertically stacking same-case bottles enables safe and easy access to all your different wines.
Cellaring and serving temperatures

Although all wines – reds, whites and Champagnes – should be cellared at the same temperature, different wines have different ideal serving temperatures. Cellar and serve your wines according to the chart below in order to always enjoy your wines at their best.

**Cellaring**

- **Fridge temperature (too cold)**: Tannins will be harsher; bitterness and acidity will be accentuated.

**Serving**

- **0° 1° 2° 3° 4° 5° 6° 7° 8° 9° 10° 11° 12° 13° 14° 15°**
  
  **Sauvignon Blanc & Champagne**

  **Optimal cellaring temperature for all wines (red, white and Champagne)**

- **16° 17° 18° 19° 20° 21° 22° 23°**
  
  **Chardonnay**

- **Pinot Noir & Merlot**

- **Ambient Australian room temperature (too hot)**: Aromas are stripped of their finesse and hidden by a sensation of alcohol.

Note: While product specifications are accurate at the time of printing, changes and improvements can occur at any time.

* Max capacity based on that achieved in our testing using standard 750ml Bordeaux style wine bottles or 330ml beer bottles.
1 When set at 12 - 14°C.
2 Dark interiors and tinted glass.
3 Refer to install specs available at vintec.com.au.
4 Actual energy consumption will depend on the ambient temperature, the set temperature and how often the door is opened.

### Detailed specifications

#### Glazed and UV-treatment

- **V2056EBK:** Triple glazed, UV
- **V208VCBK:** Triple glazed, UV
- **V3056MEBK:** Triple glazed, UV
- **V3056ES3:** Triple glazed, UV
- **AL-V3056E:** Triple glazed, UV
- **V4056ES3:** Triple glazed, UV
- **V408VC53:** Triple glazed, UV
- **V40562ES3:** Triple glazed, UV

### Warranty
Electrolux Home Products Pty Ltd and Electrolux (NZ) Limited (collectively ‘Electrolux’) warrants that for domestic applications the appliances featured in this brochure are free from defects in materials and workmanship for 2 years and warrants that for featured accessories a period of 12 months following the date of original purchase and subject to the conditions set out in the warranty card accompanying the product when purchased. This warranty is in addition to the other rights and warranties you may have under the Australian Consumer Law (ACL) and Electrolux will at all times comply with its obligations at law including the ACL. For New Zealand customers, Electrolux will at all times comply with its obligations pursuant to law including the Consumer Guarantees Act, the Sale of Goods Act and the Fair Trading Act. Where appliances are purchased in NZ for commercial purposes the Consumer Guarantees Act does not apply.

### Product information
The descriptors and illustrations in this publication apply to the specific products and models described at the date of issue. Under our policy of continuous product development, product specifications may change without notice. Prospective purchasers should therefore check with their retailer to ensure this publication correctly describes the products that are being offered for sale.

All information supplied is to be used for general reference purposes only and is on the understanding that Electrolux will not be liable for any loss, liability or damage of whatever kind arising as a result of reliance on such information. Electrolux will at all times comply with its obligations pursuant to law. Colours of products illustrated are as close as printing limitations allow.
