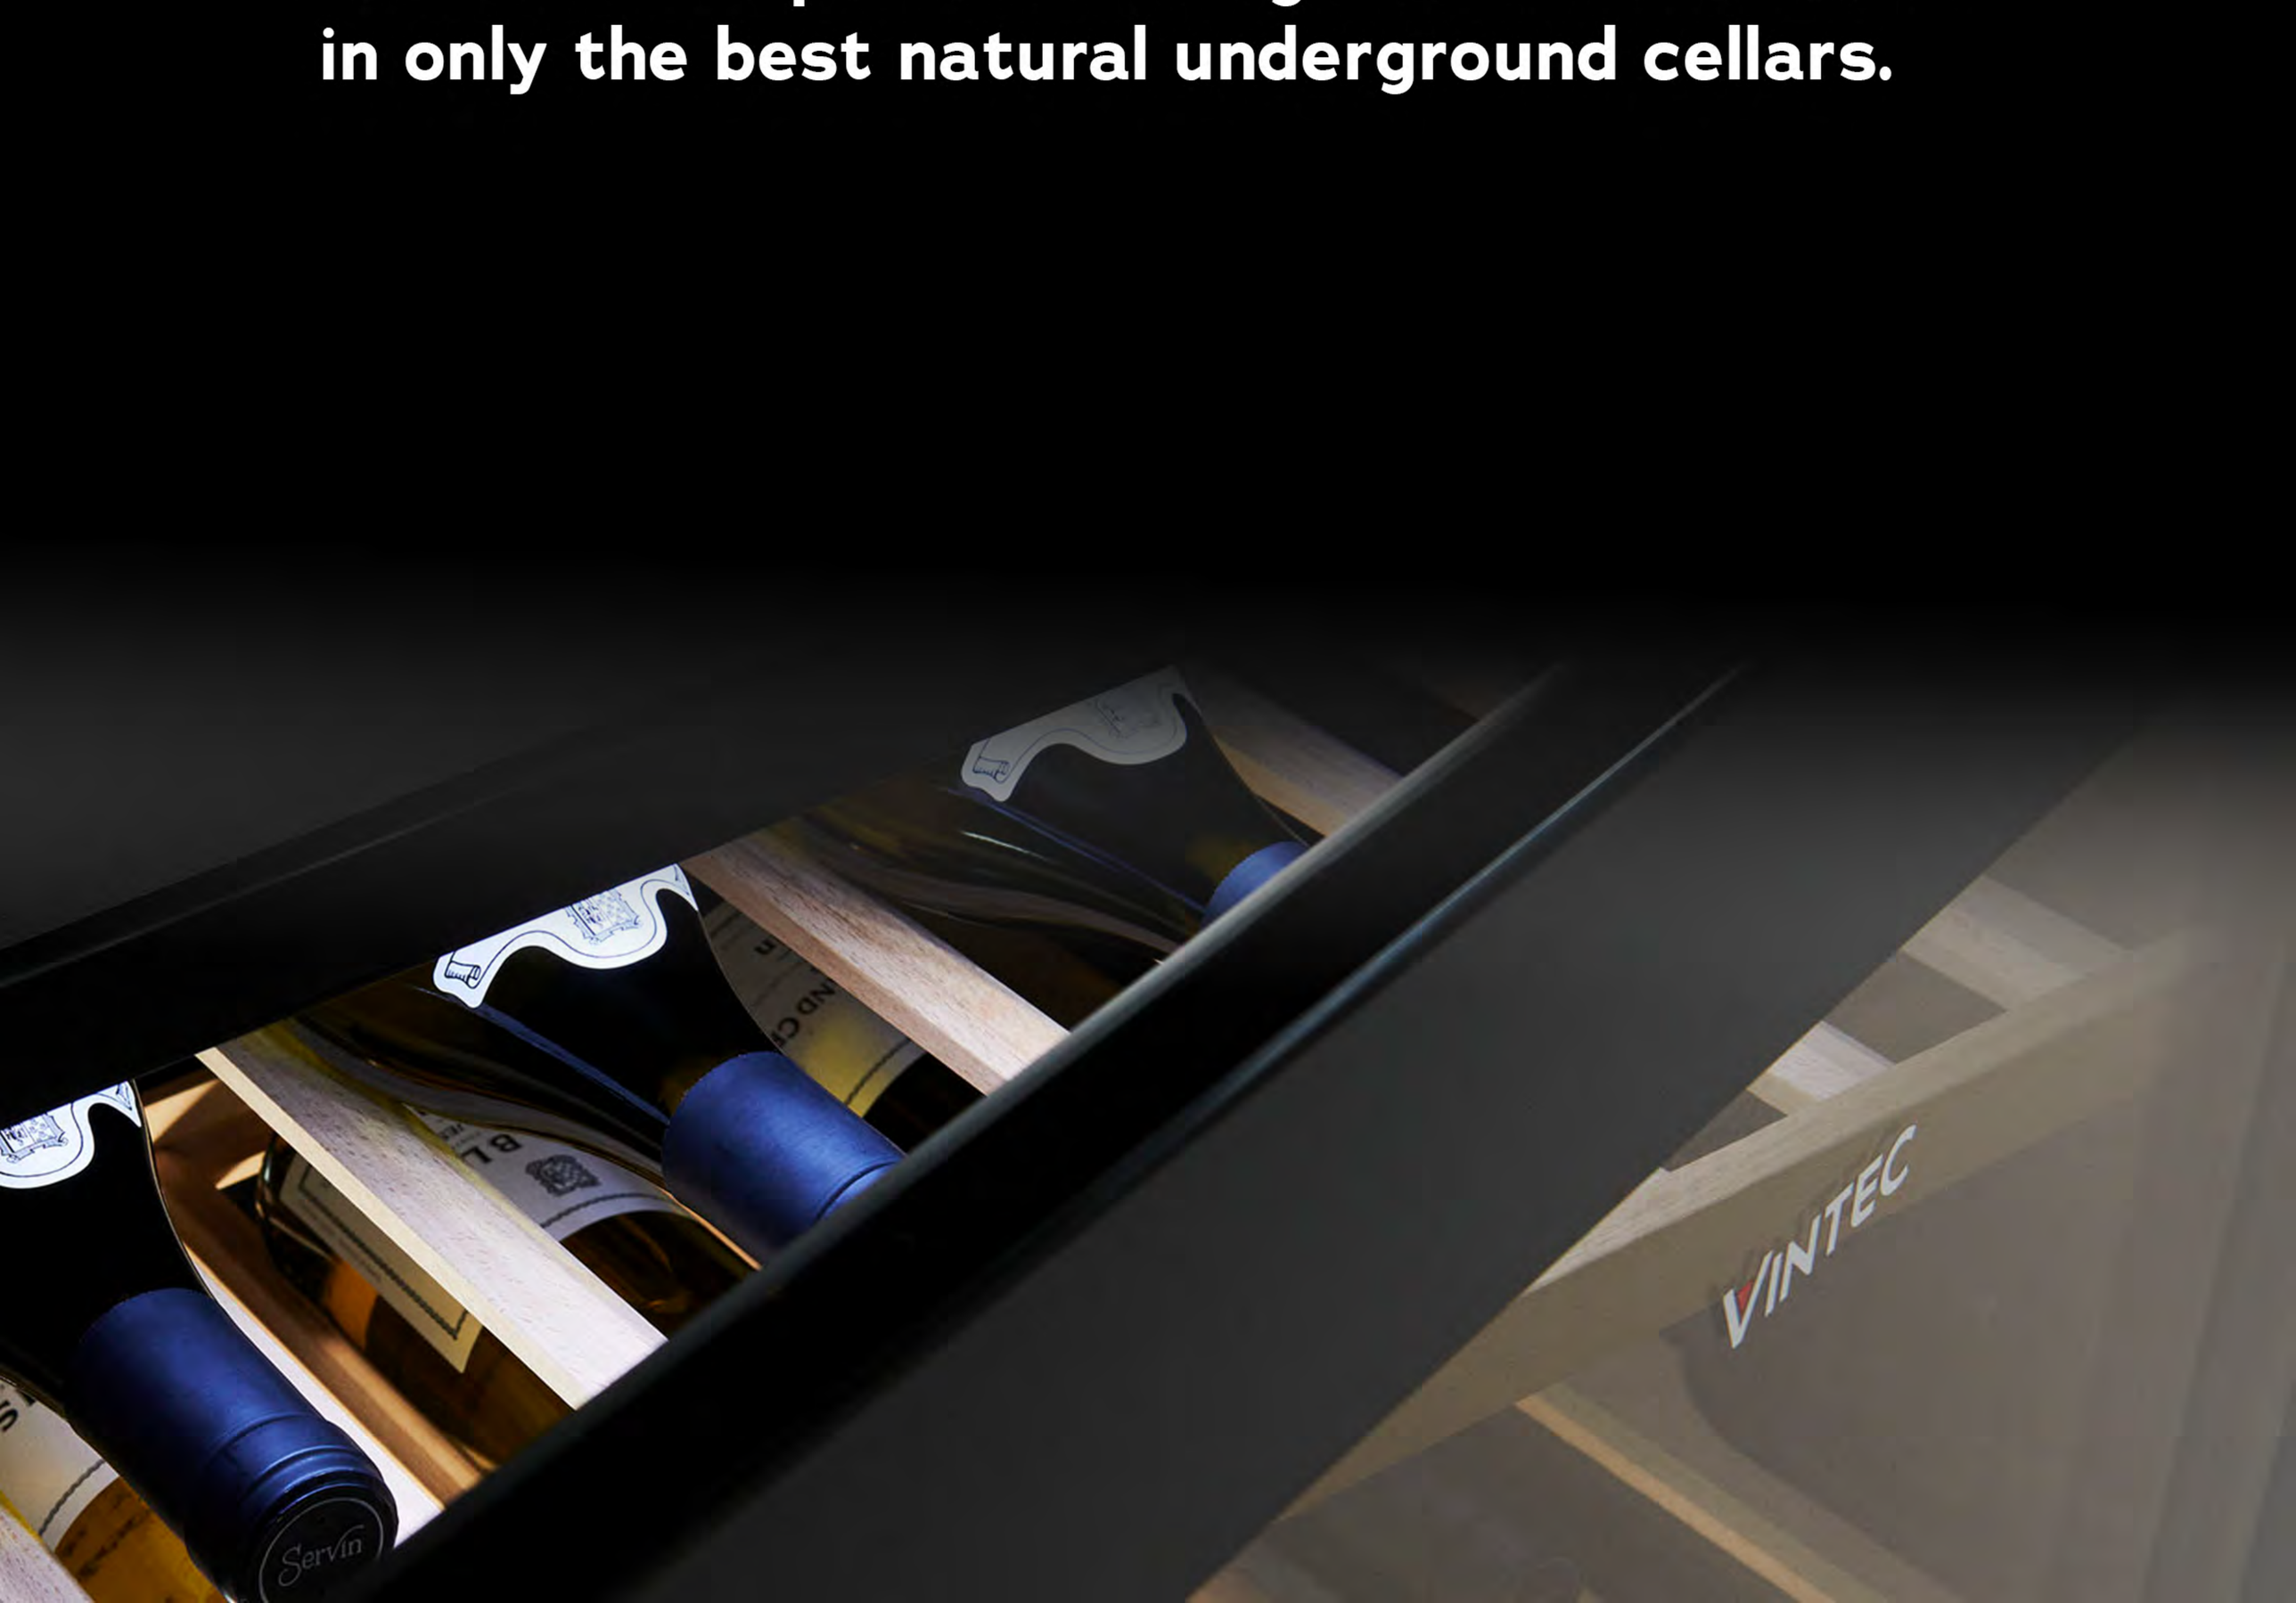
Designed for Wine Lovers, by Winer Lovers

Born from a passion for wine and to meet the exacting standards of wine professionals, Vintec climate-controlled cellars are designed to **recreate the perfect storage conditions found in only the best natural underground cellars.**



The Vintec 5 Pillars of Wine Storage

Vintec wine cabinets ensure your wines are stored in the ideal cellaring conditions by respecting the 5 Pillars of Wine Storage.

Stable Temperature

Our climate-control system maintains a very stable temperature thanks to variable speed compressors and double/ triple-glazed doors.

High Humidity

Our wine cabinets ensure adequate humidity levels are maintained (50% or greater) to keep corks moist and wines in optimal condition.

Dark Storage Area

Vintec cabinets protect wine from light damage by incorporating UV-resistant tinted and insulated glass doors, dark interiors and dimmed LED lights.

No Vibrations

A vibration-proof environment is created using low-vibration compressors, rubber shock absorbers and vibration-absorbing wooden shelves.

Quality Airflow

Our cabinets are equipped with an efficient air circulation system and a powerful air filter to ensure a constant, slow flow of filtered air throughout the cabinet.
